Municipality of Souris-Glenwood

MAINTENANCE ADVISORY NOTICE

The Souris water system will be shutting off water service between the hours of 12:30pm to 5:00pm on October 29th, 2026 to complete a water line repair.

This interruption to the water supply will lead to the loss of water pressure in a portion the distribution system at the following areas; Aspen Ave W, First St. N from Pine Ave to PR250 North and 3rd St N. Distribution depressurization can compromise the safety of the water supply. All water users are asked to follow boil water advisory precautions below once water service has been restored.

All water should be brought to a rolling boil for at least <u>one minute</u> before it is used for:

- **Drinking and ice making**
- **Preparing beverages, such as infant formula**
- **Preparing food**
- **Brushing teeth**

It is **not** necessary to boil tap water used for other household purposes, such as laundry or washing dishes. Adults and older children that are able to avoid swallowing the water can wash, bathe, or shower. Young children should be sponge bathed. If boiling is not feasible, an alternate and safe supply of water should be used.

To avoid burn injuries from hot water, caution should be taken. Please keep young children away from boiled water, and place kettles and pots away from counter and stove edges.

To avoid purchasing bottled water, water users can store tap water in clean containers for drinking water purposes and should fill the bathtub to use as toilet flushing water during the service interruption.

Once water services resume the Town will be flushing the area and testing the water. Water users may experience a sputtering water flow, discolored or dirty water after the water has been restored. This is normal and should resolve after a few minutes of running your tap. If it persists for longer than 5 minutes after running the tap, or if you have additional concerns contact 204-483-0705.

We anticipate water tests results by 4 pm on Wednesday, November 4th 2026 Unless otherwise notified, you can begin normal water use after that time.
